 2. This fund group includes those economic resources of a college or university which are expendable for the purpose of performing the primary mission of the institution (instruction, research, and public service) and which are not restricted by external sources or designated by the governing board for other than operating purposes.
 3. There are two categories of State funding to Institutions of Higher Education: Re-appropriated Funds and Cash Funds. Re-appropriated funds include the College Opportunity Fund (COF) and Fee For Service (FFS). Cash Funds come from the State through the Long Appropriations Bill (Long Bill) and may include tuition and fees, indirect cost recoveries, and miscellaneous sources that have traditionally been appropriated as cash funds to institutions and agencies of higher education.
 4. Expenditures of this fund represent the cost incurred for goods and services used in the conduct of the institution's or agency's operations in carrying out the primary mission of the institution (instruction, research, and public service). They include the acquisition cost of capital assets, such as equipment and library books, to the extent appropriated funds are budgeted for and used by operating departments for such purposes.

5. Any unexpended budget remaining at year-end is subject to university regulations regarding carry forward into the new year. There is no automatic carry forward of budget balance (fund balance). Approved carry forward amounts are brought back into the account through the budgeting process.

The Provost makes the recommendation to the President for submission to the Board of Governors. Accounts may only be established in this fund for course fees that have such approval. The only 2 exceptions are the Tech Fee accounts (259xxxx) which are denoted in Kual with the account type TF, and the Music Program Fee which is denoted with the account type code of PF.
